With a career that transcends traditional boundaries, he crafts unique pathways to a more secure and prosperous world. Recognized as an Oxford Scholar and among the global Best and Brightest EMBA's, Andrzej's diverse expertise and visionary insights inspire change across continents, countries, and industries.

## Biography

### About Andrzej Antoszkiewicz

Andrzej Antoszkiewicz has spearheaded advancements in global multilateralism, cooperation, and security over his distinguished 25+ year career which spans some of the most relevant organizations in the world. From global security to football, his multidisciplinary career includes roles at the North Atlantic Treaty Organization (NATO) in Brussels, the Fédération Internationale De Football Association (FIFA) in Zurich, the Organization for Economic Cooperation and Development (OECD) in Paris and the Organization for Security and Co-operation in Europe (OSCE) in Vienna. Andrzej has worked with Secretaries General, Presidents and Prime Ministers on ensuring that the world is a more connected,

prosperous, open, and secure place for its citizens.

While at NATO Andrzej served as the Lead for Planning and Coordination for the preparation of the 2014 NATO Summit in Wales, where he was ultimately responsible for the success of this pivotal global event. In 2015 he was appointed as Principal Advisor to the Government of Poland on the planning of the 2016 NATO Summit in Warsaw, for which he was made Knight of the Order of Merit of the Republic of Poland.

Andrzej has profoundly changed the organizations in which he has served. While at FIFA he helped lead the transformation of the federations' business model and fundamentally changed how World Cups are delivered. At NATO he conceptualized the strategy for how the organization would transform its people in the face of changing global security challenges. At the OSCE and the OECD he was responsible for significant transformations in how these organizations govern their activities, priorities, and people.

Prior to joining the multilateral sphere Andrzej held a number of senior level positions within the Government of Canada, including helping lead organizational transformation across the portfolio of Small Departments and Agencies as well as the Natural Sciences and Engineering Research Council of Canada (NSERC-CRSNG) where his leadership helped tackle the chronic underrepresentation of women in the Natural Sciences and Engineering departments of Canadian Universities. Prior to joining the public sector Andrzej started his career in Silicon Valley working in technology start-ups at the height of the first internet boom.

As part of his portfolio career, Andrzej has been space industry-adjacent for most of his life. In 1996 he pioneered the first ever high-school internship at the Canadian Space Agency and worked as part of the teams overseeing the Radarsat and MSAT programmes. He has participated in numerous fora related to the commercial aspects of the global space industry, most notably over successive editions of the Space Symposium in Colorado Springs, USA, and with the Space Foundation. Andrzej has also worked with early-stage space technology companies, helping identify opportunities linked to business strategy and access to funding. His most precious memory is a lengthy exchange he had with Buzz Aldrin on the impact which space plays in global defence and security in the context of the emergence of BRICS economies, much of which has now come to pass.

Andrzej's key strength as a speaker and moderator is his ability to connect diverse industry and government sectors to yield unique and profound insights. He has regularly spoken about the convergence of these diverse ideas and is able to bring together visions and strategies which are unique, entertaining, and insightful.

Andrzej is an Oxford Scholar where he read for a Master's in Business Administration at the Saïd Business School and graduated with distinction. He was a recipient of the Dean's scholarship and recognized globally as one of the top 100 global Best and Brightest EMBA's in 2022 by the prestigious Poets & Quants. He also holds bachelor's and master's degrees in Applied Science from Queen's University in Canada.

## Andrzej's Topics

### Multilateralism and Dialogue

An overview of how the world works at the multilateral level and the power of dialogue in advancing global peace and security. Andrzej also speaks about how this has been undermined and eroded and offers perspectives on how it can be fixed at an institutional and multilateral level.

### The Future of Global Security

Andrzej speaks about current geopolitical complexities and how these have impacted global security and can be expected to shape the future. This overview includes some thoughts on the current world order and how multilateral institutions can help, and where they're failing.

### Change and Transformation

An argument for why change is the key to establishing and keeping competitive advantage, interspersed with interesting cases and examples from my career. This includes an overview of how to go about change in a sustainable way and an exploration of how companies struggle to maintain a change and transformation-focused mindset.

### The Future of Global Sports

A resume of the evolution of global sports and a futurist perspective on how this sector will evolve in the coming decades. The topic includes the impending disruption of revenue models, the emergence of new global players, and how global sporting federations are adapting. Andrzej also offers insights into where the next commercial opportunities will arise.

### Should you Host a Global Sports Event?

As the cost of staging global sporting events increases, countries are increasingly weighing the pros and cons of hosting decisions. What are the true benefits and does it still make sense to host a World Cup or Olympics?

### The Emerging Space Economy

An overview of the history of the commercialization of space and where the sector is moving in the next decade. Lessons from NASA and the US space sector and insights on how countries can better prepare for capturing the economic benefits of the next frontier.

### The Future of Work

COVID has dramatically accelerated the existing global trend of moving from careers to jobs. Andrzej provides

an overview of the history of employment, how this has shifted, and where companies and governments are still blind sighted. What does this mean for your organization? How can companies and governments prepare for the fundamental shift in employment trends?

### **The Transformative power of AI**

A futurist perspective on the profound impact which AI will have on the employment sector. This includes an overview of how specific job categories will be affected and how companies and governments can prepare. Andrzej also speaks about the more fundamental questions of how this will ultimately impact prosperity, and what governments can do to ensure that economic benefits of AI are captured for the benefit of society.

### **Serving as an emcee or moderator**

Andrzej's skillset lends itself well to the facilitation of events. He can bring an engaging and broad perspective and have experience in conducting interviews and facilitating dialogue.
